

## Bed Bug Addendum

Date:

### 1. LEASE CONTRACT ~

This is an addendum to the Lease Contract executed on \_\_\_\_\_, by you the resident(s), \_\_\_\_\_ for the dwelling you have agreed to rent. Unit # \_\_\_\_\_ at Fort Lee Family Housing located at \_\_\_\_\_, Fort Lee, Virginia 23801.

### 2. PURPOSE ~

This Addendum modifies the Lease Contract and addresses the situations related to Bed Bugs which may be discovered infesting the dwelling or personal property in the dwelling. You understand that we relied on your representation to us in this Addendum.

### 3. INSPECTION ~ You agree that you: (Check One)

- Have inspected the dwelling and that you did not observe any evidence of bed bugs or bed bug infestation.
- Will inspect the dwelling within 48 hours after move-in and notify us of any bed bugs or bed bug infestation.

### 4. INFESTATIONS ~

You agree that you have read the information on the back side of this addendum about bed bugs and:

You are not aware of any infestations or presence of bed bugs in your current or previous apartment6s, home or dwelling. You agree that you are not aware of any bed bug infestation or presence in any of your furniture, clothing, personal property or possessions. You agree that you have not been subjected to conditions in which there was any bed bug infestation or presence.

Or

You agree that if you previously lived anywhere that had a bed bug infestation that all of your personal property (including furniture, clothing and other belongings) has been treated by a licensed pest control professional. You agree that such items are free of further infestation. If you disclose a previous experience of bed bugs infestation, we can review documentation of the treatment and inspect your personal property and

possessions to confirm the absence of bed bugs. You agree that any previous bed bug infestation which you may have experienced is disclosed here:

---

**5. ACCESS FOR INSPECTION AND PEST TREATMENT ~**

You must allow us and our pest control agent's access to the dwelling at reasonable times to inspect for or treat bed bugs as allowed by law. You and your family members, occupants, guests, and invitees must cooperate and will not interfere with inspections or treatments. We have the right to select any licensed pest control professional to treat the dwelling and building. We can select the method of treating the dwelling, building and common areas for bed bugs. We can inspect and treat adjacent or neighboring dwellings to the infestation even if those dwellings are not the source of cause of the known infestation. You are responsible for and must, at your own expense, have your own personal property, furniture, clothing and possessions treated according to the accepted treatment methods established by a licensed pest control firm that we approve. You must do so as close as possible to the time we treated the dwelling. If you fail to do so, you will in default, and we will have the right to terminate your right of occupancy and exercise all rights and remedies under the Lease Contract. You agree not to treat the dwelling for a bed bug infestation on your own.

**6. NOTIFICATION ~**

You must promptly notify us:

- Of any known or suspected bed bug infestation or presence in the dwelling, or in any of your clothing, furniture or personal property.
- Of any recurring or unexplained bites, stings, irritations, or sores of the skin or body which you believe is caused by bed bugs, or by any condition or pests you believe in the dwelling.
- If you discover any condition or evidence that might indicate the presence or infestation of bed bugs, or of any confirmation of bed bug presence by a licensed pest control professional or other authoritative source.

**7. COOPERATION ~**

If we confirm the presence or infestation of bed bugs, you must cooperate and coordinate with us and our pest control agents to treat and eliminate the bed bugs. You must follow all directions from us or our agents to clean and treat the dwelling and building that are infested. You must remove or destroy personal property that cannot be treated or cleaned as close to possible to the time we treated the dwelling. Any items you remove from the dwelling must be disposed of off-site and not in the property's trash receptacles. If we confirm the presence or infestation of bed bugs in your dwelling, we have the right to require you to temporarily vacate the dwelling and remove all furniture, clothing and personal belongings in order for us to perform pest control services. If you fail to cooperate with us, you will be in default, and we will have the right

to terminate your right of occupancy and exercise all rights and remedies under the Lease Contract.

**8. RESPONSIBILITY ~**

You may be required to pay all reasonable costs of cleaning and pest control treatments incurred by us to treat your dwelling unit for bed bugs. If we confirm the presence or infestation of bed bugs after you vacate your dwelling, you may be responsible for the cost of cleaning and pest control treatments. If we move other residents in order to treat adjoining or neighboring dwellings to your dwelling unit, you may be liable for payment of any lost rental income and other expenses incurred by us to relocate the neighboring residents to clean and perform pest control treatments to eradicate infestations in other dwellings. If you fail to pay us for any costs you are liable for, you will be in default, and we will have the right to terminate your right of occupancy and exercise all rights and remedies under the Lease Contract.

**9. TRANSFERS ~**

If we allow you to transfer to another dwelling in the community, it will be after 4 consecutive inspections and the final treatment has resulted in no evidence of bed bugs.

**Bed Bugs – A Guide for Rental Housing**

Bed bugs, with a typical lifespan of 6 to 12 months, are wingless, flat, broadly oval shaped insects. Capable of reaching the size of a apple seed at full growth, bed bugs are distinguishable by their reddish brown color, although after feeding on the blood of humans and warm blooded animals-- their sole food source— the bugs assume a distinctly blood red hue until digestion is complete.

### **Bed bugs don't discriminate ~**

Bed bugs increased presence across the United States in recent decades can be attributed largely to a surge in international travel and trade. It is no surprise then that bed bugs have been found time and time again to have taken up residence in some of the fanciest hotels and apartment buildings in some of the nation's most expensive neighborhoods.

Nonetheless, false claims that associate bed bug presence with poor hygiene and uncleanness have caused rental housing resident out of shame, to avoid notifying owners of their presence. This serves only to enable the spread of bed bugs.

While bed bugs are, by their nature, more attracted to clutter, they're certainly not discouraged by cleanliness.

Bottom line: bed bugs know no social and economic bounds; claims to the contrary are false.

### **Bed bugs don't transmit disease ~**

There exists no scientific evidence that bed bugs carry disease. In fact, federal agencies tasked with addressing pest of public health concern, namely the U.S. Environmental Protection Agency and the Centers for Disease Control and Prevention, have refused to elevate bed bugs to the threat level posed by the disease carrying pests. Again, claims associating bed bugs with disease are false.

### **Identifying bed bugs ~**

Bed bugs can often be found in, around and between:

- Bedding
- Bed frames
- Mattress seams
- Upholstered furniture, especially under cushions and along seams
- Around, behind and under wood furniture, Especially along areas where drawers slide
- Curtains and draperies
- Along window and door frames

- Ceiling and wall junctions
- Crown molding
- Behind and around wall hangings and loose wallpaper
- Between carpeting and walls  
(Carpet can be pulled away from the wall and tack strip)
- Cracks and crevices in walls and floors
- Inside electronic devices, such as smoke and carbon monoxide detectors
- Because bed bugs leave some persons with itchy welts strikingly similar those caused by fleas and mosquitoes, the origination of such markings often go misdiagnosed. However, welts caused by bed bugs often times appear in succession and on exposed areas of skin, such as the face, neck and arms. In some cases, an individual may not experience any visible reaction resulting from direct contact with bed bugs.
- While bed bugs typically prefer to act at night, they often do not succeed in returning to their hiding spots without leaving presence through fecal markings of a red to dark brown color, visible on or near beds. Blood stains tend to also appear when the bugs have been squashed, usually by an unsuspecting host in their sleep. And, because they shed, it's not uncommon for the skin casts to be left behind in areas typically frequented by bed bugs.

### **Preventing bed bug encounters when traveling ~**

Because humans serve as bed bugs main mode of transportation, it is extremely important to be mindful of bed bugs when away from home. Experts agree that the spread of bed bugs across all regions of the United States is largely attributed to an increase in international travel and trade. Travelers are therefore encouraged to take a few minutes upon arriving to their temporary destination to thoroughly inspect their accommodations, so as to ensure that any uninvited guests are detected before the decision is made to unpack.

Because bed bugs can easily travel from one room to another, it is also recommended that travelers thoroughly inspect their luggage and belongings for bed bugs before departing home.

### **Bed bugs do's and don'ts ~**

Do not bring used furniture from unknown sources into your dwelling. Countless bed bug infestations have stemmed directly from the introduction into a resident's unit of second-hand and abandoned furniture. Unless the determination can be made with absolute certainty that a piece of second-hand furniture is bed bug free, residents should assume that the reason a seemingly nice looking leather couch, for example, is sitting curbside, waiting to be hauled off to the landfill, may very well be due the fact that it's teeming with bed bugs.

### **Do address bed bugs sightings immediately ~**

Rental housing residents who suspect the presence of bed bugs in their unit must immediately notify the owner.

**Do not attempt to treat bed bug infestations ~**

Under no circumstances should you attempt to eradicate bed bugs. Health hazards associated with the misapplication of traditional and non-traditional, chemical based insecticides and pesticides poses too great risk to you and your neighbors.

**Do comply with eradication protocol ~**

If the determination is made that your unit is indeed playing host to bed bugs, you must comply with the bed bug eradication protocol set forth by both the owner and their designated pest management company.
